

Giampiero Saponaro

Junior SOC Analyst · Cybersecurity

Bari, Italy | +39 331 833 1155 | g.saponaro99@hotmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

ABOUT ME

Cybersecurity analyst with intensive training in Blue Team and Security Operations, and an eJPT penetration testing certification. Hands-on skills in security event monitoring and analysis, alert triage and incident handling, with lab experience in SIEM (Wazuh, Splunk), log and malware analysis, and Active Directory attacks. Precision, analytical thinking and responsiveness also developed in operational roles. Available to relocate and work on-site.

EDUCATION

Cybersecurity Specialist – Intensive Program

EPICODE Institute of Technology · March 2026 – June 2026

Blue Team / SOC, SIEM and Log Analysis, Incident Response, Vulnerability Assessment, Malware Analysis, Cisco CyberOps, Ethical Hacking and Penetration Testing.

High School Diploma in Languages

IISS Giulio Cesare, Bari · 2012 – 2020 · Grade 74/100

Study of English, Spanish and French; development of multilingual and analytical communication skills.

WORK EXPERIENCE

Sales & Customer Service Agent

CARWIZ International (car rental), Bari · July 2026 – present

Daily support to an international clientele, mainly English- and Spanish-speaking, using English and Spanish alongside Italian. Management of online bookings, contracts, insurance and payments, recording information in company systems. Handling of requests and incidents, on shifts.

Licensed Security Guard (GPG)

SAMO Security & Business Solutions, Bari · 2024 – 2025

Constant monitoring of security and CCTV systems, with immediate notification of critical events according to defined procedures: a surveillance, triage and escalation activity conceptually close to SOC monitoring. Autonomous handling of anomalies, with attention to detail and clear communication under pressure.

Medical Secretary

ASL Outpatient Clinic, Bari · 2021 – 2022

Management of sensitive data in compliance with GDPR, with accuracy and confidentiality; schedule organization and digital archiving, developing method and problem-solving.

Bar Assistant / Waiter

Mageco, Bari · 2022 – 2023

Service in a dynamic, fast-paced environment, with teamwork and stress management.

LAB PROJECTS

SIEM Deployment and Operation (Wazuh & Splunk)

Wazuh SIEM installation with agent enrollment, dashboards and correlation rules, event analysis. Log ingestion and search with Splunk. Alert triage and distinction between real events, false positives and anomalies, with technical reports.

Malware Analysis and Incident Response

Analysis of malware and ransomware (WannaCry, DanaBot) in tria.ge sandbox and FlareVM with FakeNet-NG and Wireshark; IOC extraction and forensic traffic analysis (PCAP).

Active Directory Attacks (Hack The Box)

Full attack chains in Windows Server environments: recovery of deleted objects with BloodyAD, Kerberoasting, badSuccessor abuse and NTLM hash extraction (Rubeus, secretsdump) up to domain compromise; documentation of each step in public reports.

Multi-host Network Pentesting (Hack The Box, TryHackMe)

Assessment of segmented networks: recon with Nmap, exploitation of web applications and services with Metasploit, privilege escalation, credential cracking (Hashcat) and pivoting into internal segments through a SOCKS proxy. Methodology aligned with the eJPT.

TECHNICAL SKILLS

Wazuh / SIEM (intermediate) · Splunk (basic) · Log Analysis (intermediate) · Incident Response (intermediate) · Malware Analysis (intermediate) · Active Directory / AD Attacks (intermediate) · Linux / Bash (intermediate) · Windows (intermediate) · PowerShell (basic) · Vulnerability Assessment (intermediate)

Tools: Wireshark, Nmap, Nessus, Metasploit, Burp Suite, BloodyAD, Rubeus, Hashcat, VirtualBox, tria.ge, FlareVM.

LANGUAGES

Italian: native · Spanish: B2 · English: B2 · French: B1
